N.E.H. SUMMER SEMINAR FOR COLLEGE TEACHERS

Topic: Descartes, Spinoza, Leibniz: Central Themes

Director: Jonathan Bennett

Place: Syracuse, NY

Time: 12 June to 4 August 1995.

Stipend: \$4,000.

This seminar will focus on philosophical issues on which Descartes, Spinoza and Leibniz all had views, especially ones where Descartes held an unstable or vulnerable middle position from which the other two departed in opposite directions: How big are material substances? How remote — metaphysically speaking — is my mind from my body? To what extent is God like a human being? The aim will be to learn and grow philosophically by doing philosophy in the company of these three great men. We shall attend carefully to some of the principal texts, and to small bits of the secondary literature. Seminararians will also have time to work on their own projects, which need not be connected with early modern philosophy.

For further details and application forms, write to Jonathan Bennett, Department of Philosophy, Syracuse University, Syracuse, NY 13244; or send an e-mail message to bennett@mailbox.syr.edu.
