G. W. Leibniz - De Summa Rerum, Metaphysical Papers, 1675-76, translated, with an introduction and notes by G. H. R. Parkinson, is in press and will appear in 1992. *De Summa Rerum* is a selection of twenty-five papers written by Leibniz between December of 1675 and December of 1676. It includes crucial papers in the philosophy of physics and mathematics and on the nature of God and the mind. The volume includes the texts in their original language, accompanied by Parkinson's translation, which makes most of these works available in English for the first time. This is the first volume of the Yale Leibniz series.
