A BIBLIOGRAPHY ON THE TOPIC OF EXISTENCE

Dennis E. Bradford

1 July 1976
Abstract:

This is a bibliography on the philosophical topic of existence or being. Nearly all the works listed are in English, and most of them are works that have been published in this century. Many of the works listed also deal with other, but closely related, topics: e.g., identity, truth, essence, substance, predication, intentional objects, properties and relations, reference, quantification, and the ontological argument for the existence of God.
