What is a Community?

A community is a group of people or animals. You don’t have to know each other or even like each other. Some people said you have to have a special connection with everybody in your community, but I don’t think you have to know them. You can’t control who moves in or out of your community. And also, my teacher says our class is a community, but my principal says our school is a community, so maybe there can be multiple communities inside one big community!
