AFTER THE RECEIVED VIEW – Developments in the Theory of Science

Gerhard Preyer, Georg Peter, Alexander Ulfig (Eds.)

*in memoriam
Wolfgang Stegmüller*

Content

Introduction: Developments in the Theory of Science 4
Gerhard Preyer, Georg Peter, Alexander Ulfig

LOGICAL OPERATIONALISM – SIGNIFICANCE AND MEANING

Wilhelm K. Essler 12
Truth and Knowledge. Some Considerations concerning
the Task of Philosophy of Science

Gerhard Preyer 40
The Received View, Incommensurability and
Comparison of Theories – Beliefs as the Basis of Theorizing

Robert Schwartz 59
Reflections on Projection

Jeffrey E. Foss 66
The Logical and Sociological Structure of Science

STRUCTURALISM – MEANINGFUL MEASUREMENT – THE CONCEPTION OF PHYSICAL LAW

C. Ulises Moulines 78
Structuralism vs. Operationalism

Nicholas Rescher 92
Meaningless Numbers

R. I. G. Hughes 113
Laws of Nature, Laws of Physics, and the Representational
Account of Theories

James R. Brown 144
Einstein's Principle Theory

INDUCTIVE INFERENCES – INTERPRETATION OF PROBABILITY – GAME
THEORY

Kevin T. Kelly, Cory Juhl 158
Transcendental Deductions and Universal Architectures for Inductive
Inferences

Howard H. Harriott 177
R.A. Fisher and the Interpretation of Probability

Brian Skyrms 194
Evolution of an Anomaly

PROPERTIES – UNDERDETERMINATION – SCIENTIFIC REALISM

George N. Schlesinger 212
Degrees of Characterizations

Carl A. Matheson 225
Observational Adequacy as distinct from the Truth about Observables

Thomas R. Grimes 238
Scientific Realism and the Problem of Underdetermination

Paul C. L. Tang 249
On Paul Churchland's Treatment of the Argument from Introspection
and Scientific Realism

RATIONALITY – METAPHORS – VALUES IN SCIENCE

David Resnik 258
Scientific Rationality and Epistemic Goals

Aldo Montesano 290
Rationality in Economics: A General Framework

Joseph Agassi 297
Science Real and Ideal: Popper and the Dogmatic Scientist

Michael Bradie 305
Models and Metaphors in Science

David Gruender	319
Values and the Philosophy of Science
